**NEW RELEASES FOR THE DRAGON 32/64
FROM SALAMANDER SOFTWARE**

TURTLE GRAPHICS

This program has been designed to provide a method of drawing pictures with your computer which is both fun and educational, and yet simple enough to be enjoyed by the young or inexperienced computer user and like certificate of achievement.

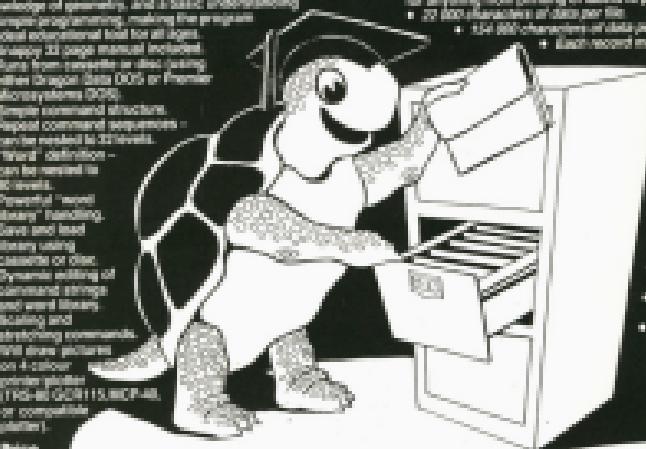

Picture are drawn by setting the "Turtle" to move forward and turn so that it traces a picture on your screen or colour printer printer.

Programs for "repeat" and "word library" facilities allow you to build up more complex programs, and you can save your "word library" on cassette tape or floppy disk.

With this you can draw a picture in any position as this is an increased knowledge of geometry, and a basic understanding

of basic programming, making the program a good educational tool for all ages.

- Simple 2D graphics
 - Simple educational features
 - Repeat command repetition can be reduced to 100 times
 - "Word" definition - can be reduced to 20 words
 - Preferred "word library" saving
 - Save and load library using cassette or disk
 - Dynamic writing of command strings and word lists
 - Scaling and stretching movements
 - 1000 area pictures on 4 colour monitor
- 11120-BE 0201/13 80CP-48
or compatible system.
Price £9.95

Please add 50p P&P for all orders. Send A5 SAE for full catalogue.

Cheques or postal orders payable to:

SALAMANDER

Salamander

SOFTWARE

17 Norfolk Road, Brighton, BN1 3AA. Telephone: Brighton (0373) 771942.

Look out for these other new releases from Salamander Software:

DRAGON: Wings of War £7.95 (part 1 Adventure), The Cocklewood Incident £7.95 (part 1 Wasteful Adventure).

BBC: Eagle £7.95 (Original Arcade Action), Turbo £9.95 (MUSIC Compiler)

DATA RETRIEVAL SYSTEM

DRS is a powerful database package for the Dragon computer, running from a standard 8086 compatible or above using the Dragon Data DBMS.

DRS will store everything you need to store and retrieve from your databases, including record and field names. Powerful full screen editor allows easy design of your own screens.

DRS contains full facilities for adding, maintaining and deleting records. Fields may be added to or deleted from existing files and other records from many units. Search facilities allow for selection of records by any position or combination of fields.

DRS also has an extremely flexible report generator, allowing for anything from printing of tables to pagged reports.

- 20 000 characters of data per file
- 154 000 characters of data per disc
- Each record may contain a maximum of 400 characters, 20 alphanumeric fields and 10 numeric fields
- Intelligent, interactive and expandable editor for enhancement of data
- Comprehensive parameters on insertion fields
- Add, delete and change records
- User definable screen displays
- User definable report generator
- Record formats may be chosen at run time
- Full range Dragon Data DBMS

Price £14.95

INTRODUCTION TO 'DRAGON WORLD'

We are all excited this month with our distribution deal with GEC which will offer Dragon considerable opportunities to prosper and grow. This arrangement also provides more exciting products as a result of combining our resources, which we are confident you will find interesting and useful.

Dragon still continues to flourish overseas and this month we greet new dealers in Canada and welcome their involvement in the DRAGON WORLD.

Finally, may we thank you for your continuing support for DRAGON WORLD. You are very pleased with the response to date and look forward to your correspondence which is proving to be most helpful.

SUBSCRIPTION OFFER

SUBSCRIPTIONS FOR DRAGON WORLD CAN BE OBTAINED DIRECT FROM DRAGON DATA FOR £4. THIS WILL ENTITLE YOU TO 6 BI-MONTHLY ISSUES MAILED DIRECTLY TO YOU AND THE FORM FOR THIS CAN BE FOUND IN A SEPARATE INSERT TO THIS MAGAZINE. IF YOU KNOW OF ANYBODY WHO MIGHT BE INTERESTED WHO CURRENTLY DOESN'T RECEIVE THE MAGAZINE, PLEASE LET THEM KNOW OF THIS FACILITY.

EDITORIAL

"We have been aware for some time that there is a need for more peripherals for Dragon computers, so we are delighted to be able to give you the advance information that a whole new range of products, including printers, plotters and a data recorder, will be available shortly. Full details will be given in the next issue of 'Dragon World'. This, coupled with the new product range to be launched soon, means a very exciting future for Dragon Data."

You may well have heard that GEC have signed a sales and marketing agreement with Dragon Data. It will be of great benefit to all to have the strength of the mighty GEC behind Dragon Data, and GEC have been able to add home computers to their vast range of products. We hope this arrangement will enable Dragons to be available in far more outlets than before, but let us assure you that Dragon Data will still be here to help you with any problems or difficulties you may have.

The winner of the Dragon User of 1983 competition has been decided. This was a very difficult task, as the standard of entries was so high: thank you for all your entries — we hope to have a similar competition this year.

The response to our software offers has been immense, and we are pleased to say that we have more special offers for you this issue. New software titles are appearing on a regular basis and reviews on several items are included in this issue.

We do appreciate receiving contributions from Dragon Users, as usual, please send all communications to the editorial address.

OASIS SOFTWARE

present . . . TWO NEW
RELEASES

DRAGO

PETITE PASCAL

Software written by the
programmers for the
programmers of the
microcomputer

SPRINT

Basic Compiler
For the DRAGON 32

SPRINT BASIC COMPILER

A rapid step forward in
Home Programming.

The highly-revised 1.1 updated
compiler version of SPRINT BASIC
for Dragon 32 and 64 owners.
By converting your own BASIC
programs into intermediate code,
SPRINT accelerates them up to 5
times 10 times their normal
running speed. Supporting variable
width integer BASIC, and contains
unusual commands.
SPRINT programs are not
only completely language but
also run independently
of the compiler.

PETITE PASCAL

Not just a language - an education in structured programming.

The most educational subset of the
structured programming language is the visual
structured programming language. It is the visual
method and environment for developing
programming skills.

An appropriate use of PETITE PASCAL is generally
considered the best way to teach your
understanding of structured languages. This is
a must for anyone interested computing on basic.

C DRAGON CHESS

- Six levels of play
- All eight pieces in colour, including pawns, castling and pawn capture promotion
- List of previous moves stored which can be displayed or printed.

- Looking and saving of game positions from tape.
- High resolution graphics which can be printed round board back or white tiles from either end.
- Full double-sided board graphics.

- Solid colour enclosed board 30x30cm
- Anti-mouse hire.
- Set up from any position.
- Opening move library.
- Measures the total board and plays recorded from any point.
- A straight disk access system.
- Complete version of the game with a working version of the game and documentation from Customer Services.
- Large board of play at computer speed.
- The graphics.
- Will adjudicate games between humans.
- Very high standard of graphics.
- Professional packaging available from your dealer.

USER CLUB NEWS

I realise all has been quiet on the Dragon/ Data Ltd. front for a while now but this month we are looking to change that. One proposal has been organised round of the factory. Many of you wish to see how we operate and this would be an ideal opportunity. We also plan to open our shop facility at the end of the tour so you can buy all those goodies you are having difficulty obtaining from the dealers. Anyone interested, please contact me, or Kevin Stephens, on 0686 7447709 for further details.

Good news on the software front too, we are now offering 10% discount on most of our software products to those clubs who have contacted me. Special 'Club' order forms will be issued shortly. If you have not as yet sent me your details and want to take part in this scheme, just pen to paper with details of your club.

I hope that you now feel that things are moving in the right direction. Keep the letters flowing in with news on your clubs.

PEN PALS

Mr. Fred Bellfield would like to start up a Pen Pal Club and anyone interested should contact him at St. Swithun Hill, Quarry Bank, (Stanley Hill), West Midlands DY8 2AT.

CLUB LIST ADDITIONS

ENGLAND

Hants.

Contact Mr. Adrian May,
Portsea Island Co-op,
60/62 Fratton Road,
Portsmouth.

Hants.

Romsey Area Dragon User Group has regular meetings and a newsletter. For details, please send SAE to:
Ashley Adamson,
St. Elmo,
Sob Lane,
West Willow,
Romsey SO5 0BY
or (phone Romsey 23041)

Herts.

Contact: Paul Kennedy,
The Herts & Essex Dragon Owners Club,
88 Aspasia Close,
Ware.

Herts.

Paul is looking for new members in his area, club membership is modest at present, with 14 members on a good day.

Lancs.

Contact: Steve Malloch,
4 Kempton Avenue,
Blackpool FY2 5HS.
Steve wants to start up a club in the Blackpool/Fylde area.

London
Philip Firth,
Time & Talents Youth Club,
Community Centre,
The Old Mortuary,
St. Mary Church Street,
Rotherhithe
London SE16

This is basically a youth club but they have got two Dragons. A registered charity, aimed to help 11-18 year olds, I am sure that others of help will be welcomed.

Manchester

Master John Edwards,
50 Bedford Drive,
Bury St Edmunds IP2 8PF

John is an enthusiastic 14-year old who would like to start a club for the Greater Manchester area. You may contact him by telephone, but please ensure that you phone ONLY between 6pm and 7pm. Tel. No: 061 999 4439.

Middlesex

SD Micro Group,
41 Roseworth Road,
Harrow,
Middlesex HA1 2UD

This club will be of more interest to the serious programmers. They cover aspects of various BBC series micros and have a bi-monthly newsletter including a page for Dragon users. Membership is £8 per annum.

Surrey

P. R. Young,
(Dragon Computer Club),
Flat 1,
3 St. Johns Road,
Epsom,
Surrey KT1 3EP

Only local members required as a start. New club with limited free membership, monthly newsletter etc.

WALES

Bridgend
Mr. Bonfield,
3 The Glen,
Daleside,
Bryncathin CF30 8UX

Mr. Bonfield is the chairman of the Bridgend & District Micro-Computer Club which meets every Wednesday at 7pm at the Aberfanfa Miners Welfare Hall. You may write to Mr. Bonfield but he cannot guarantee a reply to every letter.

Cardiff

Hywel Francis,
8 Aspasia Close,
Cyncoed,
Cardiff.

Hywel Francis would like to extend an open invitation to anyone interested in a club in the Cardiff area. You may contact Hywel direct or leave your name and address at Steve's Computer Company, Castle Arcade, Cardiff.

OVERSEAS

I have had a letter from a user in Thailand who would like to know if there are any other users out there. If you are in Thailand, please contact me and I can put you in touch.

Craig Syde.

READERS' CONTRIBUTIONS

The first contribution this month is from Mrs. Pam D'Arcy for Parcomsoft Ltd., 21 Mycombe Lane, Wycombe Green, High Wycombe, Bucks, who has been kind enough to prepare an additional information sheet on Pixel Editor. This applies to the Multi-Coloured Pixel Routine and the sheet is printed below.

Technical Appendix B (Multi-colour pixel routine)

Having experienced problems in trying to use MCPR (particularly when varying the character set size) the following information has been discovered and may be of use to anyone else experiencing similar difficulties.

MCPR parameter area layout (16 byte-area commencing at address "A+2" (p.26) or "A1+2" (p.39).

Locn.	Other refs	pages	Description of content	Value set to at load
A+2	A1+2,DX	19,20, 24,28	X co-ordinate (theoretical range 0-384)	120
A+3	A1+3,DY	19,20, 24,28	Y co-ordinate (theoretical range 0-191)	0
A+4, +5	A1+4,+6, & VPT	19,28, 29	Address of VARPTR descriptor	\$36CF
A+6, +7	SBP	29	Grid character set base address	(p. page 5/51E2D9)
A+8	SH	29	Grid character set height (= rows)	0
A+9	SW	29	Grid character set width (= PMODE3 address elements)	8
A+10	—	—	Number of characters across the grid (i.e. integer of 128 CH, as when Pixel editing)	21
A+11	—(PSP?)	—	Required graphics display line spacing (rows) (PMODE3 <2>)	12
A+12	—	—	Read, graph display char. spacing graph.	12
A+13	A1+13	19,20, 25,29	End of line-character (not the freq. mentioned "<" but shift & ↑)	12
A+14	—	—	"Normal" foreground colour for the character set (= internal code = Pixel Ed code-1) If the colour for the current PMODE3 element being displayed in this, it uses current Basic foreground (B8,2) unless	2 (blue magenta)
A+15	—	—	colour switch has been requested (A+16) "Normal" background colour of the char. set when created (internal as above). If the colour for the current PMODE3 element being displayed in this, it uses the current Basic background colour (B8,0)	1 (yellow red)
A+16	—	19,25, 29,31	Colour switch code	01-B401

A parameter DBP (p26) is mentioned. I think that the relevant reference should be to locations \$0A,\$000 (base address of current graphics page).

Also, when using Pixel Editor, should the background colour selected be colour code 4, as the grid lines are in that colour regardless, the system may appear to be "furring" particularly if a large grid size has been selected but it is in fact installing the screen without you being able to see it (doing so and patience is eventually rewarded by the "cursor" appearing).

The competition to draw "the star in the sea" produced some very good entries and we wish we had space to print more than one. Our winning entry from Graham Bell requires the LINE command to produce a star with a graceful and symmetric shape.

```

9 REM STAR --- GRAHAM BELL
10 PMODE4,1,SCREEN 1,1,PC16@COLOR 1,0
11 B=84:C=128:D=76
12 FOR A=44 TO 128 STEP 4
13 LINE (A,B)-(C,D),DPSET:D=D-4:
14 IF D<0 THEN D=0
15 NEXT A
16 D=76
17 FOR A=212 TO 128 STEP -4
18 LINE (A,B)-(C,D),DPSET:D=D-4:
19 IF D>0 THEN D=0
20 NEXT A
21 B=84:C=128:D=92
22 FOR A=44 TO 128 STEP 4

GEC DRAGON

DRAGON DATA AND GEC

GEC at Shire Pages

The announcement that GEC had taken over the sales and marketing of Dragon computers and software from 1st February 1984 has opened up a completely new field for both operations.

For Dragon it means that the resources and reputation of Britain's biggest name in the field of electronics and electrical equipment of all kinds has been put behind our company's business.

For GEC, a company concerned with the marketing of consumer electrical and electronic leisure and entertainment products, it adds the range of Dragon computers and software and extends the outlets from which they will become available. With new and exciting products planned for the year, access to more and more customers can only mean good news.

Let's take a look at the company with whom Dragon has been allied.

Quite literally GEC's products and expertise range from the depths of space to the depths of the Earth; from giant power generating equipment to handy sized telephones, from an integral role in national and international defences, to fireside-entertainment of TV and video.

The General Electric Company plc (GEC) is Britain's biggest electronics and electrical company and ranks amongst the best in the world. UK-owned and managed, GEC employs 139,000 people in the UK and 41,000 overseas. It has 150,000 shareholders. Turnover at £6,466 million has nearly doubled in the last five years. The company's financial position is extremely strong and in 1982/83 pre-tax profits reached £870 million. During

the same year the Company spent £299 million on capital expenditure and £530 million on research and development and engineering new products.

GEC operates in a decentralised way, allowing the management of its many operating units the maximum freedom to run their businesses. Amongst the businesses are many famous names such as Marconi, Ruston, Plessey, Hotpoint, Danam, Express Lift and W & T Avery.

GEC is Britain's largest exporter of capital goods and last year shipped to customers overseas equipment worth £1,142 million.

Dragon Chief Executive and Managing Director, Mr. Brian Moore, speaking about the GEC involvement said, "We are very excited about the prospect of integrating our range with the well established consumer electronics products marketed by GEC. The whole field of consumer electronics is growing at a tremendous pace. Our Dragon products have been very successful, we achieved record sales for our current home computers ... and we have new products coming on stream which we expect to do equally well. These new products will strengthen our position in the home computer market as well as moving us into the accelerated growth area of professional and small business usage".

Mr. Alan Bosanko

Mr. Alan Bosanko, Chairman, GEC McMichael said, "This marketing arrangement with Dragon Data following so quickly on the acquisition of the Ayr Videotext business, significantly strengthens our position in the fast growing home electronics marketplace". This relationship between GEC and Dragon will enable us to further strengthen our product range and utilise the skills and resources of both companies to the full.

Dragon Data believes that this arrangement with GEC will lead to a bigger and better service for customers, but don't forget that Dragon's Customer Support Department will continue to help and advise you in any way possible.

NEW SOFTWARE FOR THE DRAGON

SPIRTE MAGIC

Sprite Magic is quite simply the best Dragon utility available on the market today. Merlin Micro Systems have accomplished the seemingly impossible by giving the Dragon Sprites the ability to use graphics. Sprites (for those who have been on another planet for the last year) are independent graphic objects that can be put into motion by a single command and return a special value when hit.

There are 41 new commands which form an extension to the Microsoft Basic supplied with your Dragon computer and can be used within a Basic program. There are more features within this package than those supplied by some built-in sprite routines. There is, for example, an excellent feature called MAZEON which enables you to construct a maze around which your sprites must travel; these sprites can be made to chase or flee from the user's sprite. Do I hear the title of this game being whispered in the background?

The documentation is quite fully so don't expect to be using Sprites as soon as you purchase the package, but after carefully reading the commands section you should be ready to experiment on your own. If you cannot wait that long then there are seven Demonstration programs on this tape several of which could have made games in their own right, a listing of this will give great insight into the techniques of using Sprites.

There is now no need for those amongst you, who are unfamiliar with machine code, to produce lifeless games. Now with this package and a few lines of Basic, Pac-Man and Frogger will soon be flashing across your screen.

Sprite Magic is available now on mail order from Dragon Sets ... see separate insert.

SPRITES FOR THE DRAGON

- Up to 128 semi-destructive sprites.
- Automatic animation.
- Automatic maze-running mode.
- Text in all modes.
- Re-definable character set.
- Enhanced sound facilities.
- Comprehensive manual.
- Nine single pixel to 1600 pixels.
- Automatic joystick/keyboard control.
- Collision-detection.
- True lower case ASCII.
- Auto-repeat keyboard.
- Dozens of powerful new commands.
- Six free demonstration programs.

Some time ago, we decided to add text printing facilities to the Dragon's graphics system. Although it took three weeks of hard work we did it, for all five PADDLES. We made the characters re-definable but we did not call them sprites because they are not, they're re-definable characters. Then we decided to add some sound effects and user-definable sounds. After another week or so, we had done that as well.

Next, we thought we would give the Dragon some sprites. We required multi-coloured sprites of any reasonable size or shape and we wanted to be able to move them without disturbing whatever else might be on the screen. We quite fancied being able to control sprites from the keyboard or joystick with just a single command and we thought it would be nice to be able to fire sprites with the joystick buttons. No sprite system worth its salt would ignore collisions, we thought, so we would have to have collision detection. Also, we wanted the sprites to be fast, versatile and easy to use, with lots of functions so that the control program would know where all the sprites were and what they were doing. Another improvement was to include an automatic maze running feature where all the sprites chase (or run away from) a particular sprite, so that it would be easy to write THAT kind of program. Then we thought we would like to have easy animation, preferably looked after automatically by the sprite handling system. Finally, just to make the whole idea totally impractical, it would have to be driven entirely from Basic, without any tedious Peeking and Poking.

We did it. It took months, but we did it. The author of the two top-selling Dragon games in a recent best-sellers list has described Sprite Magic as the best piece of software he has ever seen. P.C. Weekly said "excellent" and "superb". Modesty forbids, but we think it's pretty good too.

Please send Access/Visa number or send cheque or Postal Order for £17.25 to -

Tel: (0642) 454863

DRAGON ANSWERS BACK

Question

Can you tell me if it is possible to load a number of short programmes from tape and then to 'merge' them without losing them?

Answer

It is possible using a BASIC routine we have available. Unfortunately, this routine is too long to be listed here; should you require further details, please send a SAE to our Customer Support Department stating what you require.

Question

I have a Dragon 64 computer and I wish to download via RS232 a program to my Dragon from a large machine which also has an RS232. Is this possible without using specialist software?

Answer

This is possible using the following routine:

```
10 ' TO DOWNLOAD A PROGRAM FROM
    ANOTHER COMPUTER SELECT SERIAL
    OUTPUT ON THE MASTER COMPUTER AND
    LIST PROGRAM TO SERIAL PRINTER THEN-
20 POKE&H169,&H0A:POKE&H16D,&H12
30 POKE&HAC1,&12:REM ONTO DRAGON 64
35 ' THE PROGRAM WILL APPEAR ON THE
    DRAGON SCREEN AND WILL BE CRUNCHED
40 ' ONCE LOADED PRESS RESET AND LIST
    PROGRAM
```

This routine configures the Dragon to accept input from the RS232 and then lists it as if it was any keyboard input.

Question

I would find it very useful to have a hard copy of everything that my Dragon prints on the TV screen. Is there a routine to direct the output to printer and screen simultaneously?

Answer

The following routine should achieve the desired results:

```
POKE &H169,&H0B
POKE &H169,&H0F
POKE &H167,&H0E
To CANCEL, POKE &H167,&H0B
To RE-START, POKE &H167,&H0E
```

Question

Sometimes when typing in a listing from a book or magazine, I have come across a pound sign. However, this symbol is not on my Dragon's keyboard and I can find no way of getting it on the screen. Can you help?

Answer

The confusion arises because printers are not entirely standardised in the way they interpret character codes. The Dragon assigns code 96 to the "#" symbol. On many printers, this code is allotted to the "!" sign. If you encounter a "!" sign, substituting a "#" will allow the program to run correctly.

Question

I have read that the Dragon 64 incorporates an auto-repeat facility for the keyboard. Is there anyway that I can implement an auto-repeat on my Dragon 32?

Answer

All that is needed is a subroutine to set the keyboard rollover table every time an auto-repeat is required. The rollover table is stored in locations &H150 to &H169 and can be set by POKEing each location with &HFF. Try running this short BASIC program as a demonstration:

```
10CLS
20PRINT "HOLD DOWN ANY KEY"
30FOR I = 0 TO 9
40POKE &H150 + I, &HFF
50NEXT I
60AS=INKEY$ PRINT AS;
70GOTO 30
```

Question

I am interested in using a light pen with my computer, but I am not exactly sure of what they do. Please explain their function and tell me where I can get hold of one for the Dragon.

Answer

A light pen is a device used to assess the intensity of light emitted by any point on the TV or monitor screen. It is connected to the computer via one of the joystick ports. If a light pen is pointed at a particular point on the screen, the computer is able to calculate which spot on the screen is being referred to. Thus, with suitable software, they can be used to choose between options displayed by the computer, or even to draw directly on the screen.

We ourselves stock a versatile light pen which retails at £9.95 and is available through mail order.

Question

Although I find that most Dragon 32 software runs perfectly on my Dragon 64, I have had some difficulties with 'Breakout' and 'Middle Kingdom'. Is there anything I can do to make them run as they should?

Answer

Both programs will run perfectly if you make these simple modifications:

'Breakout': Load Game. Once loaded, type:

```
POKE &H1E20,&HFA
EXEC
```

'Middle Kingdom': Load Game. Once loaded, type:

```
POKE &H1E00,&HFB
POKE &H1E00,&HFF
```

Datopen

A QUALITY LIGHTPEN

for the DRAGON 32 microcomputer

Datopen**£25**

Inclusive of VAT, P&P. Two different drawing programs provided free with each lightpen, "SHARD" and "SHARD-CREATE". SHARD has superb high-resolution colour drawing program allowing both precise drawing and freehand sketching, painting etc. SHARD-CREATE is a high-resolution library shape drawing program.

SUPERIOR PROGRAMS

- Tape storage of your works
- Good documentation
- User routines provided on tape and on printout

Also available for BBC-20, Commodore 64 or VIC 20. Please make your choice when ordering.

Send cheque or P.O. for £25 to:-
 Dept D/W 1, Datopen Microtechnology Limited,
 Kingslere Road, Overton, Hants. RG25 2JU
 Or send S.A.E. for details. Now available from good computer shops.

**SUPERIOR PERFORMANCE**

- Insensitive to ambient lighting
- Responds to different colours
- Program accessible LCD/Compu-readout
- Switch for program control

"It differs from all other lightpens available for the Dragon in that it is a far more sophisticated beast... this program (SHARD)... clearly demonstrates the superiority of the Dragon."

SHARDS proudly introduce for the Dragon 32

"The Mystery of the Java Star"

THIS IS AN EDUCATIONAL ADVENTURE OF EPIC PROPORTIONS

Taking up over 100K of memory, including 80K of high resolution graphics, and loading in four parts, this adventure is designed to provide hours of family fun, filled with puzzles, challenges and interesting facts. Also, with three levels of difficulty and a score sheet at the end, this is a game you can play again and again, to try and beat your last score.

You have discovered an old map and a ship's log book, indicating the existence of magnificent treasures, including a mysterious ruby, the Java Star, aboard an 18th-century sailing ship, that sank in the Caribbean. You must mount an expedition, gathering all the necessary information, then search for the shipwreck and the hidden treasure. Many skills are needed to solve this mystery, making it the ideal adventure for friends or family to play together.

**ALL THIS
FOR ONLY
£7.95**

MACHINE CODE CORNER

MATHEMATICAL SKETCH PAD

This is for the many Dragon users who need to sketch graphs. 'O' level mathematics students can explore the behaviour of functions with this program irrespective of whether they can program or not.

BASIC allows you to define 'one-line functions'. The statement:

```
DEF FN(X)=2*X*X+3*X+1
```

allows future lines of program to refer to (for example) FN(0) which would equal $2 \cdot 0^2 + 3 \cdot 0 + 1 = 1$. To write an all purpose program allowing users to specify such a function, either the full line must be written by the user, or we need an effective way of creating such a line from an INPUT statement.

To do this, we need to know how such lines are stored in the RAM of your Dragon. A short program is sufficient to unlock the secret.

```
10 ST=256+PEEK(198)+PEEK(197)
```

```
20 REMXXXXXX
```

```
30 FOR I=ST TO ST+20 PRINT PEEK(I):NEXT
```

Line 10 finds the position in RAM of the next executable statement, in this case line 20, and line 30 produces the numbers 0 20 42 0 20 128 68 68 68 68 68 68 0 38 78 0 30 128. These numbers can be interpreted as follows:

The two bytes 00 42 determine the position in RAM of the next line, 01 200 specify the line number (20 in this case), 030 is the 'token' for 'REM', followed by 0 38's 038 is the ASCII code for 'X', and the end of the line is marked by a zero.

The most important aspect of this is the notion of "tokens" representing the key words of the BASIC language. If we replace line 20 with

```
30 DEF FN(X)=X+X-X*X*X+X
```

and run the program again, we find the following tokens:

DEF(1152), FN(192), -(+)(233), +(195), -(196), *(197), /(198), and *(199).

With this background information we can begin to see how to use the characters of a string FB to create the appropriate line of program — scan each character to see whether it should be a token, and if so, POKE the appropriate token into the program line, otherwise POKE the ASCII value instead.

In the following program, subroutine 130 does precisely this, together with the necessary tokens for

```
DEF FN(X)=
```

and to finish the definition, the characters 00 (0) and 138 (REM) are POKE'd. (REM is a useful statement to end the function, because the remainder of the line is then ignored.)

```

```

As it stands, standard functions like SIN, COS etc. cannot be used, since no provision has been made to translate these into tokens. Nevertheless a wide range of graphs can be sketched using this program. All you need do is to input the required function, together with the range of x values you want the graph to cover, and the number of points (up to 256) you want calculated in this range. The program lists the values of the function at the appropriate points (you can tell the scroll using SHIFT-TAB) and gives the corresponding range of function values. When a key is pressed, the graph is drawn. Where the range of x or y values includes 0, an axis is drawn.

The standard functions are represented by two bytes — FF (255) followed by 127+n, where n is the number of the function in the table of standard functions, which

starts at address \$B81CA in RAM. For example, SIN is at 250 followed by 138, because SIN is the seventh function in the table. To see a list of the functions and their corresponding numbers, run the following program:

```

10 J=128:I=$B81CA
20 PRINTJ,J,,J+1
30 X=PEEK(I)+I+1:IFX>128THENEND
40 PRINTCHR$($I):GOTO30
50 PRINTCHR$($I-128)
60 IFI>$A8250 THENEND

```

To include these functions, we need a routine which analyses the string FS and searches the table to match sequences of characters with the standard function words. This can be done in BASIC, but the response time is rather poor. The following machine-code program does the job a lot faster.

```

The program is written in Position Independent Code (PIC), which means that the same code will work anywhere in RAM. PIC is very easy to write for the 6809 and will be discussed in detail in a future article. For those who are using the OREGAM Editor/Assembler, it is convenient to assemble the code starting at address 102801 — this is available when OREGAM is located at the top of RAM, and is not needed by the BASIC program. Before loading OREGAM, type CLEAR 1020, 102802. The program will then automatically assemble from byte 102801.

The code can, of course, be PGED into RAM using a BASIC program — simply put the sequence of bytes 1E, 10, CC, 40, 80, 10, A3, 91 ... into DATA statements and run a program to PGED them in, starting at any convenient position above 102800.

Lines 1-6 search the simple variable space (indicated by the contents of \$1B/C) for FS. Line 8 loads the D register with the "length" of FS and line 11 loads Y with the address of the first byte of FS. Line 12 loads U with the address of the Function Table. There are 34 function words line 13.

Lines 10-12 check for a first-letter "match" between the characters of FS and the table. If one is found, lines 13-20 check the rest of the word. Lines 21-24 replace the character string with the corresponding token and close up the resulting gap. The final part of the program deals with strings of letters which are not functions (i.e. variables).

Two techniques are used which may be new to some readers. The brackets in lines 48 and 50 indicate "indirect addressing". For some assemblers these should be typed as square brackets. In OREGAM, lines 48 and 50 are Stack operations — the contents of register U are PUSHED onto the System Stack, and later PULLED back into register Y. Both User and System Stacks may be used for this sort of temporary storage of values, and a sound understanding of how the Stacks work is invaluable for the serious machine-code programmer. These techniques will also be discussed in a future article.

(Continued on page 17)

YOUNG USER'S PAGES

PLEASE REMEMBER THIS DRAGON

As the programs you write become more interesting you see how much you need to be able to put special information into your program — the sort of information which enables the same program to do different things. This sort of information is often described as DATA (tunguva-datum). This time we are going to look at some of the different ways we can get data into the Dragon.

Most people enjoy the sort of program which requires you to respond even if only to enter your name. Both computer games and anthropelets let's require a response. This type of program is called INTERACTIVE.

Can you teach Dragon your name? One way of getting your name into Dragon's memory is to use the INPUT command. After the command you must give a variable name so that whatever is put in can be stored and recalled. Here is an example:

```
10 CLS:INPUT NAMES
20 CLS:PRINT "HELLO ",NAMES
```

When you RUN this tiny program you see a question mark on the screen. When you type your name and press <RETURN> your name is put into the variable NAMES. The next line clears the screen again and prints HELLO followed by your name. Of course your name is made up of letters and must be stored in a string variable which has a \$-sign after it. What if your Dragon wants to know more about you?

```
10 CLS:INPUT NAMES$AGE
20 CLS:PRINT NAMES;" YOU ARE ";AGE;" YEARS
OLD."
```

This time Dragon expects two pieces of information, one string and one number. Try entering just your name. Dragon waits for more. You are supposed to enter your age as a number. See what happens if you enter it as a string.

```
CHRIS
27TWELVE
2600
CHRIS.12
CHRIS YOU ARE 12 YEARS OLD
OK
```

When you see OKDO, you must re-enter the whole input!

When you want to enter something during a program you program should indicate what to enter. A question mark on its own looks rather demanding and rude. The INPUT command lets us do this easily. The 'prompt' is written in quotes and is followed by a semi-colon. Put it on a new line 10:

```
10 CLS:INPUT "NAME/AGE ";NAMES:AGE
```

Only one prompt is allowed in any one line so NAME and AGE must come in the same prompt.

Suppose you wanted to enter an address:

```
30 INPUT "ADDRESS";ADDRESS$8
40 PRINT ADDRESS$8
RUN 30
```

```
ADDRESS$ 32, RAM STREET.
EXTRA IGNORED
32
```

All that is stored in ADDRESS\$ is 32. The computer took the comma in the address as separating two variables. We can overcome this by using LINEINPUT. Change line 30:

```
30 LINEINPUT ADDRESS$8
RUN 30
32,RAM STREET,
32,RAM STREET.
```

Now the whole address is in ADDRESS\$. But there is a snag — there is not even a question mark to remind us to enter something. You can add a prompt (with question mark) as with INPUT or supply your own prompt using PRINT.

```
30 PRINT "ADDRESS ? "
```

Now type RUN30. You see we have our prompt on one line and the input on the next. To get them on the same line you need a semi-colon at the end of the 30. In fact we can place the prompt and the response wherever we want on the screen by using PRINT@. Here is a new line 30:

```
30 CLS:PRINT@ 100,"ADDRESS ? ";LINEINPUT
ADDRESS$8
```

Of course you can use this with the ordinary INPUT too. Sometimes it is useful not to have the question mark for input. Use LINEINPUT instead but remember you can input only one variable and it must be a string. If you want a number, put it into a string first and convert it using VAL, etc.

```
60 PRINT "WHAT IS THE NEXT NUMBER 1 2 4 8 ";
60 LINEINPUT NS$2:VAL$1
70 IF NS$ = "1" THEN PRINT "RIGHT"
RUN 60
```

Now this is all very well but, when we use either of the INPUT commands, that input is printed on the print screen or on the print screen which we want to alter without printing we can use LINEINP. This notes which is the next key pressed but doesn't print anything. We can make a very useful subroutine with this. Type NEW first to clear away the old program.

```
NEW
1000 K$=INKEY$:IF K$="" THEN 1000 ELSE
RETURN
```

When your program meets this subroutine it puts into K\$ the next value of the KEY. If there is nothing there it goes back and tries again. If a key has been hit it returns to the program and that key is shown in K\$. Here is a demonstration:

```

10 PMODE3,1:SCREEN1,1:POLS
20 GOSUB10000:N=VAL(J$)
30 IF N=R AND N>0 THEN COLOR N:
DRAW"1234567890"
40 GOTO20
10000:KEYS$=":":IF IO$=""THEN 10000 ELSE RETURN

```

When you run this program you will see a blank screen. When you press a number between 1 and 8 a square appears. You can change its colour by pressing a different number. Press <F5> to go to the menu.

You can still print letters on the screen. The next little program uses the same subroutine and prints whatever you type both forwards and backwards! Please **ENTER** to start.

```

10 CLS
20 GSUB1234:IF KS=CHR$(12)THEN END
30 PRINT#33+R_KS:PRINT#470-R_KS:
40 N=N+1:GOTO 10
1000 KS=KEY$:IF KS="" THEN 1000 ELSE
      RETURN

```

Subroutines are very useful when you want to do the same sort of thing many times. Perhaps you want to draw lots of circles. You could have a program like this:

```

10 PMODEL1:SCREEN1:POLS
20 X=180 Y=60 R=30 C=2 H=1 S=1 F=0
30 GOSUB1000:GOSUB1000
40 END
1000 KS=INKEY$:IF KS="" THEN 10000 ELSE
    RETURN
10000 CIRCLE (X,Y,R,C,H,S,F):RETURN

```

When you RUN this, you will see a circle. When you change R you will see a circle with a different radius. Let's do this with a FOR loop.

200-總合問題集(中級)

Pressing any key sends the program to the next stage
first one cycle, then the next.

If we want to do a lot of circles we can READ our data, the values of X, Y, R and then DRAW statements. Simply change from 30 and add and end the class line.

20 READ X,Y,R,C,H,B,F
40 READ R,GOSUB1002:GOSUB1004
100 DATA 100,50,30,2,1,1,0,50

We can easily add more lines like line 42. In the following program we have used this technique for the whole program. The subroutines themselves read the data they receive.

```
16 ROM EASTER CARD 1  
18 PMODES,1 SCREEN1,0 PC15  
22 GOSUB1120-GOSUB1990  
30 PAINT1120,1000,3,4  
40 GOSUB1120-GOSUB1990  
50 GOSUB1120-GOSUB1990  
60 PAINT1120,500,1,4 GOSUB1000  
70 GOSUB1120-100 GOSUB1110 GOSUB1000  
80 GOSUB1120-GOSUB1990  
90 READ AS;GOSUB1040  
100 DATA 128,198,456,1,128,1  
110 DATA "BL2525E2525F2525E1F2525F"  
120 DATA "128,198,456,1,128,1
```

```

170 DATA "EM124.75;NGNFR"  
180 DATA 1100000000  
19000 IF INKEY$=IC:="" THEN 1900 ELSE  
    GET IC
```

```

1010 READ A,Y,R,U,H,S,F
1020 CIRCLE(X,Y,U,R,H,S,F)RETURN
1030 READ AS DRAWAS RETURN
1040 READ T3
1050 DRAW "C4" + AS PLAY T3:GOSUB 1030:
      DRAW "C5" + AS GOSUB 1030: 0.01*1000

```

Just keep pressing the space bar. To continue another theme we have another program which looks almost the same but has different data. The special thing here is that the data tell which subroutine is run in next.

These programs are easy to build up but rather difficult to follow once you've forgotten what you wrote.

ВАНДЕСТЕР СИДА

```

18 PMODES,1-SCREEN1,0,PC153

```

Just for fun we have here a program which demonstrates **KEYBOARD**. The program controls the cursor and you can make it show in different colours with the numbers one to eight. When you press the space bar it stops drawing and you can move about the screen without altering your picture. You can change a screen colour at the start by just pressing <ENTER> you can select a screen and the background.

(Continued from page 11)

To integrate this code into the BASIC program, just insert the following line:

25 EXEC10001

When the machine code is loaded, the program will now allow the use of most of the Standard Functions.

SPEECH and ADVANCED SOUND

Constituted and other things, different you have said readings — there is no such thing as a single reading. But there, you know, there, general things, some things, there are, I think, a few more or less.

[View original image](#)

The second of the two groups of species described in this paper is composed of those which have been hitherto placed in the genus *Leucostoma*, and which, as far as can be determined from the available material, do not belong to it.

— 1 —

The recommendations presented here are giving detailed types of actions and their costs to stakeholders in different world climate scenarios by year by year, by crop, forest and power sectors. Boxes, Figures 2-6, 8 report this project's results after beginning.

100

The first class of students is designed to measure our major and minor outcomes within measured through three metrics: the test and project. Each program consists of a minimum of 100% passing rate (test and project).

and more integrated educational system, transportation, public works and energy resources. The focus of regional plans will shift away from economic development planning to regional environmental protection and sustainable development. It is believed possible that through the implementation of regional environmental planning, the government can better manage its natural resources and reduce the negative impacts of economic development on the environment.

SOFTWARE REVIEWS

For this edition of Dragon World we have concentrated on the educational programmes available for the Dragon 32 and 64. We have used two different independent sources to review the software — Mr. John Fullick, Youth Leader of the John Pound Youth Club in Portsmouth very kindly for us reviewed Words Words Words, Number Gulpers and Cranky. The other reviewers were two young girls, Kate and Rebecca, with a little help from Kate's older sister.

The John Pound Youth Club

This was opened in March 1983 to help meet the needs of youngsters with educational learning difficulties. It has a membership of over 80 with a very wide range of activities offered to the youngsters, including the access to a Dragon 32 Home Computer. For this review we asked John, with the help from the members of the Club, to review some of our educational range of software.

REVIEW

I have reviewed the three items of software in relation to their use with students designated as ESENMD i.e. mostly educational sub normal, aged 10-19. Their reading ages range from 5-10 years and number ages from 5-11 years, years.

Words, Words, Words £19.95

is a mixture of instructional and revelatory software designed for young children to read. It can be best used by the teacher and pupils working together and is at its best with smaller groups i.e. up to 3 pupils.

The instruction material is well written and supplies the teacher/user with an introduction containing the objectives, intended skill areas covered, loading procedures, use of the programme including correction procedures and a very useful dictionary of the words used.

Basically the programme enables the user to build up a scene, e.g. street, house or castle, by correctly spelling the names of objects presented on the screen.

Once the user has chosen which scene he wants to begin his story, objects begin to appear on the screen. The user then has to correctly spell these. The programme allows two mistakes before showing the correct spelling. If all the objects are spelled correctly a reward is given — the 'scenes' come to life, with some of the objects doing various things.

The programme was popular with the students across the ability range and only one criticism was noted. Although the graphics are good, they are not as good as the 'Hide and Seek' programme from ASK, which the students have used extensively. The students found it difficult to recognise some of the objects e.g. the boy, the girl, the balloon and it would seem that a slight enlargement of detail would help a great deal adding to the quality of the programme.

While helping the students to practise the main achievement was in getting them to use their imagination and stimulating ideas and interest for story writing.

Number Gulpers £19.95

Very popular with all the students because of the 'arcade' style of presentation and a very useful programme for students with learning difficulties because of the range of difficulty levels and the ability of the programme to drop to an easier level should the user fail to successfully complete one level.

The idea of the game is quite simple, but the actual operation requires more skill than it appears at first.

The user has to move a 'gulper' around a maze-type board containing numbers that have a +, -, x, or / sign next to them. The user chooses a number between 10 and 1,000 (the lower, the easier) and then the computer selects another number. The user then has to ate his gulpers to eat the numbers required to make up the difference between the chosen number and the computer selected number. As if this isn't hard enough, you are racing against time as your energy store is decreasing with time and each number you 'gulp'. At the higher levels, 'scramblers' appear which, if hit by your gulpers, randomly change the selected number thereby forcing the user to rethink the strategy for making the new number.

The students soon found that a pencil and paper were essential for planning their 'routes' before starting the game.

The programme also includes a Self-Test option with which the user can test how much progress is being made in using numbers. It consists of ten questions, varying in difficulty according to the level of the last 'gulpers' game played, which are answered in the shortest possible time.

A highly entertaining interactive game which while making it fun to practice number skills also involved the students in using strategy and forward thinking skills.

Cranky £19.95

Another popular programme with the more able students.

This one is really playing with numbers! Cranky is a pocket calculator whose circuits get damaged by rain. It is the job of the player to repair the circuits by making the number patterns that have been damaged. In the basic game the player can only use the numbers 3 and 6 and the +, -, and =, signs to construct numbers but in 'Challenge' you can choose your own two numbers to manipulate.

This programme really tested the students addition and subtraction skills to the full and new techniques, number patterns and relations were found. Like 'Gulpers', this programme also encouraged the students to develop and explore their own strategies usually by trial and error at first.

This revelatory programme was best used by students on their own with periodic supervision and was a help in giving many of the students initial confidence in discovering their own ability to successfully manipulate numbers.

Summary

Most of our students are naturally 'turned off' from literacy and number work because of their learning difficulties and the biggest advantage of the computer and educational software has been the confidence they gain in being able to 'play around' with words and numbers and to explore patterns, all at their own pace; without the pressure of time or a teacher's patience! (The Dragon hasn't blown a fuse yet!!)

Katie and Rebecca are six years and seven years old respectively and attend Presteigne Primary School in Mid Wales. They reviewed three of Dragon Data's new educational software titles for Dragon World: Facemaker, Children From Space and Shape Up. Each of these titles are designed specifically to enhance one particular aspect of a child's education.

REVIEW

Facemaker £19.95

This was Katie's and Rebecca's favourite program. The aim of 'Facemaker' is to draw a face by typing certain commands into the computer. The girls took it in turn to draw each other and, whilst finding the pictures very amusing, took it quite seriously. As a result they did not find it too long or boring.

Some of the vocabulary had to be explained — words such as 'cliff' and 'bulbous'. The program did prompt certain questions, such as why certain relatives wore glasses, and these were discussed.

The only criticism that came from the girls was that they did not understand all the words used, but this problem was soon solved.

Children From Space £19.95

The two girls found this considerably harder than 'Facemaker' and as a result found it tedious. The main reason was that they were too young to enjoy it. The program demands grammatical accuracy and is really suited for children slightly older than Katie and Rebecca.

The game has four episodes in which different aspects of English are explored — correction of common spelling mistakes, changing of tense, order of jumbled sentences, choosing the more appropriate of two words to fit into a sentence.

This particular piece of software was slightly too advanced for Katie and Rebecca.

Shape Up £19.95

In contrast to 'Children From Space', 'Shape Up' was a little too easy for the girls. It was very enjoyable but the girls mastered it a bit too quickly.

The four games on this title are designed to introduce and familiarise children to different shapes and sizes. Each game is slightly harder than the last. The clever use of colour and moving graphics meant that the children's interest was kept. However, it was too easy for the two girls and is more ideally suited for the younger child.

BRIDGE

Bridge Master with its excellent graphics and presentation makes the player feel that he is participating in a bridge game.

The outstanding features are:-

- (1) The player can elect to bid either the North or the South hand and, as declarer, play each of 100 bridge hands.
- (2) Before making his first bid he may elect to have the computer display the point count and honour trick valuation of his hand.
- (3) At the end of the auction the computer will, if requested, give a review of the bidding.
- (4) At any stage during the play of the hand the computer may be asked to remind the declarer of the contract and display the number of tricks made to date.
- (5) At the end of the play on each hand the computer will, on request automatically run through the hand showing the correct bidding and play.
- (6) Although the operator may make any bid, or play any card he chooses, the computer will accept only those bids and plays that are correct. The beginner therefore receives necessary instruction whenever a mistake is made, and errors are not compounded. At any time during the bidding or play the computer may be asked for advice and will respond with the correct solution.

This solution consists of a cartridge and cassette containing 100 different hands. It is a course of instruction in both bidding and play for the beginner and an entertainment and challenge for the intermediate player. There are two manuals. The manual of instruction contains a short introduction to Bridge, a Summary of Opening Bids, a Hand Valuation Chart, a Scoring Table and a Glossary of Bridge Terms. The second manual contains instruction in the form of comments on the bidding and play for each of the 100 deals.

For use with the Dragon 32 and the Dragon 64. Joystick optional. Recommended retail price is £29.95.

DRAGON USER OF 1983 COMPETITION

We had no idea that Dragon owners were so inventive. The entries in our "User of the Year" competition were of such a high standard that we had to award five Dragon 64s!

Of course there had to be an overall winner and that honour goes to Tariq Mohammed, a doctor at Booth Hall Children's Hospital in Manchester. He receives a Dragon 64, plus a large parcel of software.

Tariq works in the Department of Paediatric Gastroenterology and he devised a program to work out the feeds for children who are fed intravenously. The program also provides a print-out of instructions for the pharmacy and nurses.

Congratulations to Tariq and we hope he will keep up the good work with his prize.

The other four winners of 64s were equally interesting and inventive. John Wilkinson of Wiltshire uses a Dragon 32 to help in his work on fuel and ignition specifications at Jaguar Cars.

At an Electricity Control Centre in the West Country, a Dragon 32 is helping B. J. Parish and colleagues to display the status of the sub-station breakers. Using high resolution colour graphics and the powerful built-in basic,

the Dragon outpaced very much more expensive solutions.

In Cambria, a schoolteacher named Stephanie Fair uses her Dragon to write simple graphics for a partially sighted four-year old pupil. Stephanie reports that the pupil's concentration improves remarkably when working with the graphics, which he enjoys enormously.

Our final winner is Rachael Hart of Amersham, Bucks, who has used her Dragon 32 to help a friend to translate English books into Russian.

Altogether a marvellous selection of users and users who thoroughly deserve their prizes.

The runners-up, who each win a "Super Dragon Writer 11" cartridge, are:

- R. Callow, Daventry, Northants.
- A. E. O'Farrell, Wyken, Coventry.
- Henry Dugours, Herstal, Belgium.
- A. Dowley, Warwick.
- A. Faran, Sutton, Ipswich, Suffolk.
- P. Gladchuk, Borton, Manchester.
- Major T. T. Hatchett, Church Crookham, Hants.
- Winton Hart, Leyland, Lancs.
- A. F. Isa, Westbury-on-Trym, Bristol.
- T. Martin, East Grinstead, Sussex.
- H. L. Nyman, Harrow, Middlesex.
- G. Powell, New Inn, Pontypool, Gwent.
- G. Scoulton, Stalmine Dale, Monseyside.
- A. Spencer, Weymouth Bay, Renfrewshire.
- G. Thomson, Dunblane, Perthshire.

We intend to feature articles on each of the competition winners in future issues of "Dragon World".

DRAGON 64

DRAGONS IN DRAGON

Our Production Department had a problem — and an answer to that problem. The problem was obtaining information for management statistics — the answer was a Dragon 64E, a double disk drive, a printer, a television screen and a little flair and imagination.

The production manager, Mike Lewis, was constantly frustrated by the time and effort his clerical staff had to put in to provide him with the information he needed to complete various management reports. So when the Dragon 64E was launched, and later the OS-9 operating system was developed, he saw the combination as a solution to a problem.

When compiling management information and statistics, the major drawback is the time it takes to collect, collate and update the data. If the history data is, however, on disk the time and resources saved can be considerable. Mike Lewis had three specific areas where a suitable computerised system appeared to be the answer to the manual system his staff currently used.

The first of these areas was information on the stock rack racks. These are used in Dragon Data to test and "turn on" the computer componentry for a specified

period of time. The information on the number of good and reject boards is obviously essential to the production area. Using BASIC, a database was established to hold daily recordings of such things as loading/unloading times. Now information is immediately available and passed to Quality Control; it is then incorporated in the weekly production efficiency reports.

The second area which was integrated to a computerised system was the production efficiency reports. Using BASIC and the manual information already established on standard hours, a database was established. This enables access to a file of information which, when used in conjunction with daily production reports, forms the basis of a daily and weekly area by area efficiency report. Any area not to standard is immediately highlighted and action taken.

The third area looked at was the one of software control. Although the company uses a main frame computer which has a finished stock file as well as the facility for invoicing accounts, a major expenditure would have been necessary to set up the type of stock control system needed for software. The Dragon 64E in conjunction with OS-9 would, however, accomplish the same ends at a fraction of the cost.

Once this was established, a weekly update of production/sales for each item enabled a report to be generated indicating on-going sales and total worth value held in stock, stock held on each item; and those items requiring re-ordering. Mike Lewis can now give other areas within the organisation the accurate information they need to perform their jobs efficiently.

From ideas initiated in the Production Department, other departments are now evaluating possible uses within their own areas. We will keep you up-dated on any further uses of Dragons within Dragon.

Complete Dragon Business System being Used in the Stock Control Area ...

... and also the Monitor the Board Test Operation.

St. George now has two choices!

Red or green will slay the Dragon

- ▲ Nylon encased-Steel shafted joystick with ball and socket joint.
- ▲ Fast sprung return to centre.
- ▲ Graphite wiper linear potentiometers.
- ▲ 12 Months Guarantee.
- ▲ 7 day Money back Guarantee.

Complete control at your fingertips

The smooth action of the Voltmace delta sprung return joystick is now available to Dragon owners. Each joystick has been individually tested before it leaves our factory, following extensive robot testing to prove the design has tested in more than a million cycles. This means that not only will your joystick be strong, tough and reliable, but it ensures long life, accurate control and with the choice of red or green

fire buttons, gives instant recognition between the left and right joysticks.

If you are not completely satisfied with the Delta 3d, return it to us within seven days for a full refund.

THIS MONTH . . .

In response to the many requests for a word-processing feature, "This Month" we have reviews of the two word-processing packages available from us and, as a printer is required for these packages, we are reviewing a selection of printers.

The review of printers is restricted due to space available this issue, but we hope to review other makes in future issues. If there are any particular models you would like to see reviewed, please contact us at the editorial address.

"SUPER DRAGON WRITER II"

The first wordprocessing package to be reviewed is "Super Dragon Writer II". This is priced at £39.95 and is available now. The review has been prepared by Doug Bourne of the Dragon Independent Owners Association.

The "Super Dragon Writer II" word-processing program arrives in the now standard video box which, when opened, reveals a ROMPak and a thick manual. It is at this point that we choose our course of action. Do we plug in the ROMPak and run the program, or do we read the manual? Well, if you do like me and do the former then you very quickly find yourself reaching for the manual and, in fact, the manual tells you that the best way to learn is by reading and using the information given.

So let's do it again. Plug in the ROMPak and switch on. First comes up the colourful title page. By pressing any key we enter the command mode and the display mode of 84 characters per line, 21 lines per screen. This is a big improvement over the small box that we normally see.

The command mode is as its name implies, how we tell the program what we want from it. We now decide whether we would like to alter the display mode for one of the other options. There is the lowres, 32 x 16 display which is the standard display with the standard inverse letters for lower case. The colour can be changed from green to orange. Next, the hi-res display which are 81 x 21; 61 x 24; 63 x 31; 64 x 32; 66 x 31 and 66 x 24. Also in the 64 displays you can choose narrow or wide characters and, as in the lowres display, the colour can be changed between green or white and inverse. In all the hi-res modes you get true lower case with descenders.

Pressing "BREAK" puts you into the text entry mode in which you can write your letters or whatever. If you make a mistake, you just position the cursor using the arrow keys and type over to correct the error. You can delete characters using the command (CLEAR) key and D.

When you have your block of text, you will want to see if it looks correct before printing so command P gives you the option of printing or window. Asking for window (W) shows how the text will look. Here I found that if at this time I entered the 84 column mode, the text showed better. You can now see if you need to move anything around, e.g. change the position of one paragraph for another. This is accomplished using BLOCK MOVE and

BLOCK DELETE. If you are satisfied with everything, then all that there remains to do is to print the text. Pressing the command (CLEAR) key then P, you will be asked whether you want print or window. Prints 2 pages and away it goes.

There is much more it can do, too much to mention here. In fact, the price of the program belies its capabilities. It has features not found in more expensive programs. It can be used with any printer with minor adjustment to take into account differences in their control codes and any special function they might have.

There are cheaper cassette-based programs on the market and, indeed, more expensive ones but for ease of use with the ROMPak and its ample facilities, not to mention its price tag, this must make "Super Dragon Writer II" the most useful program to come from Dragon Data.

"STYLOGRAPH"

For those of you with Dragon 64s and disk drives, this word-processing package, which runs under OS-9, may be of interest. Priced at £79.95, we feel that it is an excellent buy when compared to other similar packages. Please note that you would require the OS-9 system disk to run "Stylograph". "This Month's" review is by Duncan Smead, whose name may be familiar to you as co-author of "Inside the Dragon".

"Stylograph", Mailmerge and Spellcheck is one of the new titles now available in Dragon Data's Professional Software series for OS-9 operating systems on the Dragon 64. The basic-style pack contains the floppy disk, a comprehensive manual, a command summary reference card and a keyboard function reference chart.

"Stylograph" is a "professional" word-processor providing facilities normally only found in word-processors costing many times its price. It makes use of the 81 by 24 text screen mode (by using the OS-9's "gsf9" command) for upper and lower case characters and normal terminal emulation. "Stylograph's" SUPERVISOR mode presents the user with a menu of possible options available such as "EDIT", "PRINT", "SHIFT AND RETURN", etc. The "EDIT" option transfers Stylograph into its ESCAPE mode, where most of the editing of existing text takes place. The user can scroll through the text on a character, line, or page basis or a "search" string can be used to specify the position within the text.

Commands exist to replace, move, duplicate and delete text and to perform single character overwrite, insert and delete.

The EDIT mode is the one where you can type in the text just as you would on a typewriter and formatting is carried out during input on a "what you see is what you get" basis. In other words, the text is laid out on the screen as it will appear in the final print-out. The formatting commands are too numerous to describe in detail here but they do control things like the page length, header/footer definitions, line spacing, justification, line lengths, indentation, character spacing, paragraph settings, printer control parameters, and whether characters will be underlined, overlined, subscripted, superscripted, or emboldened.

About six full pages of A4 text can be held in the RAM text area. However, text files larger than this can be manipulated by storing part of the text on disk, and/or by using the Mail Merge package.

Mail Merge has been designed to complement Stylograph in three ways. Firstly it provides the facility to merge together a number of small text files when printing. Secondly it allows a file of, say, names and

addresses to be merged with a "standard" text file so that letters, etc., can be "personalised" when printed. Thirdly this package can be used to print multiple copies of the same file. In all these cases Mail Merge can take advantage of OS-9's multi-tasking capabilities and be run as a background task. For example, a text file can be typed while a long document is being printed.

The final package of the trio, Spellcheck, is used to check each word against a dictionary of over 42,000 words! A miss-spelt word can be: (a) ignored, (b) added, (c) marked so that it can be easily found by Spellcheck, (d) displayed in context, and (e) corrected, in which case all occurrences of that word will be corrected automatically in the text file.

It has not been possible to do justice to the full range of facilities and options provided by the above packages in the limited space available for this review. Suffice to say that it is an indication of their power to know that the complete range of OS-9 manuals was prepared and printed using them.

PRINTERS

DYNEER DW16

Price	£329
Type	Daisy Wheel
Interface	RS232 or Centronics
Maximum Speed	18 cps
Graphics Capability	Limited
Maximum Width of Paper	12 inches
Direction of Printing	Bi-directional
Legibility	High

This printer brings better quality printing within the reach of the home user. Although the machine is rather slow, it prints to a standard that would impress any businessman. It is clean and easy to use, with the controls and DIP switches being easily accessible. The manual is more comprehensible than most.

Provided printing time is not at a premium, the DW16 offers unbeatable value for money.

MICROLINE 82A

Price	£369
Type	Dot Matrix
Interface	Centronics (optional RS232)
Maximum Speed	120 cps
Graphics Capability	Blockgraphics and Hi-res
Maximum Width of Paper	9.5 inches
Direction of Printing	Bi-directional
Legibility	Average

A fast, efficient printer which offers reliability and a sturdy construction. Since it is at the bottom of the Microline range, it does lose a little of its legibility when printing at maximum speed, although this would not trouble most users. All basic functions can be found fairly easily in order to get started.

It has an overall feeling of quality and will be of interest to the home/small business user.

MICROLINE 82

Price	£369
Type	Dot Matrix
Interface	Centronics (optional RS232)
Maximum Speed	180 cps
Graphics Capability	Hi-res facility
Maximum Width of Paper	9.5 inches
Direction of Printing	Bi-directional
Legibility	Good

The Microline 82 has facilities for a wide range of print styles and formats. It is very fast, sturdy and its high-resolution features are easy to access. A double strike facility allows the print to approach correspondence quality, although it still falls short of daisy wheel standard.

If you are looking for a machine to handle the donkey work of your printing requirements, then this one is worth of consideration.

ADVERTISING RATES

If you would like to advertise in 'Dragon World', then please contact Mr. Kevin Stephens or Miss Cathy Hyde at Dragon Data Limited on 0656-744700. Our rates are highly competitive:

Full page colour	£490

OKI Microline 92

So fast- and NLQ

NLQ = Near Letter Quality.

It's just one of the many outstanding features which put the OKI Microline 92 into the printer at the top of the 90-column leagues. Add to this standard print at 190 cps, high resolution graphics, dot-align, double character sets, codes up!, superscript and underline capability, and you will see why the Microline 92 is an unbeatable producer/print.

The Microline 92 offers the same printed specifications to users requiring a full 136-column format.

And if all this is not enough, both machines are compatible with our unique IBM Plug'n'Play Kit, ensuring full compatibility with the IBM PC.

As even more impressive feature list, including a print speed of 200 cps, becomes the 120-column Microline 94. In addition to its increased throughput capability, the optional Automatic Cut Sheet Feeder permits maximum use of the near-letter-quality print media.

Quality, reliability and unbeatable price/performance are of course hallmarks of the entire OKI Microline range, including the ever popular Microline 90, 940 & best selling entry-level printer.

The range is completed by the Microline 82A (180 cps) and the Microline 83A (120 cps) which offer a print speed of 120 cps amongst a host of other features.

OKI Microlines - the unbeatable printer family!

WINDRUSH MICRO SYSTEMS

BUG ZAPPER

£25.00

MACE

£25.00

D-BUG

£25.00

A complete mobile computer system designed for the DRAGON 32. It runs BASIC independently of the computer, has its own memory up to 64K, and assembly language at the users disposal. This makes it perfect for those who want to write their own programs.

Windrush Micro Systems Ltd. also offer the Windrush BASIC package which provides a comprehensive introduction to assembly language.

For further information, please contact us. You have access to over 1000 DRAGON 32 programs via our program library.

As an independent house manufacturer for the DRAGON 32, we invite you to come and see that it may be used for writing, graphics and applications as well as memory DRAGON 32 users can now benefit from a unique range of software packages. Windrush Micro Systems Ltd. also offer the Windrush BASIC package, which provides a comprehensive introduction to assembly language.

Windrush Micro Systems Ltd. also offer the DRAGON 32 in the DRAGON 32/64 version. DRAGON 32/64 has 64K of memory, plus 16K of extra memory, 128K of memory and 16K of extra memory. This represents an increase in memory of 50% and 100% respectively. DRAGON 32/64 is also available in 64K version. DRAGON 32/64 is the most advanced machine to be offered and is extremely fast.

Windrush Micro Systems Ltd. also offer the DRAGON 32/64 in the DRAGON 32/128 version. DRAGON 32/128 has 128K of memory, plus 16K of extra memory, 256K of memory and 16K of extra memory. This represents an increase in memory of 100% and 200% respectively. DRAGON 32/128 is also available in 128K version. DRAGON 32/128 is the most advanced machine to be offered and is extremely fast.

Windrush Micro Systems Ltd. also offer the DRAGON 32/128 in the DRAGON 32/256 version. DRAGON 32/256 has 256K of memory, plus 16K of extra memory, 512K of memory and 16K of extra memory. This represents an increase in memory of 200% and 400% respectively. DRAGON 32/256 is also available in 256K version. DRAGON 32/256 is the most advanced machine to be offered and is extremely fast.

Windrush Micro Systems Ltd. also offer the DRAGON 32/256 in the DRAGON 32/512 version. DRAGON 32/512 has 512K of memory, plus 16K of extra memory, 1M of memory and 16K of extra memory. This represents an increase in memory of 400% and 800% respectively. DRAGON 32/512 is also available in 512K version. DRAGON 32/512 is the most advanced machine to be offered and is extremely fast.

Windrush Micro Systems Ltd. also offer the DRAGON 32/512 in the DRAGON 32/1M version. DRAGON 32/1M has 1M of memory, plus 16K of extra memory, 2M of memory and 16K of extra memory. This represents an increase in memory of 800% and 1600% respectively. DRAGON 32/1M is also available in 1M version. DRAGON 32/1M is the most advanced machine to be offered and is extremely fast.

Windrush Micro Systems Ltd. also offer the DRAGON 32/1M in the DRAGON 32/2M version. DRAGON 32/2M has 2M of memory, plus 16K of extra memory, 4M of memory and 16K of extra memory. This represents an increase in memory of 1600% and 3200% respectively. DRAGON 32/2M is also available in 2M version. DRAGON 32/2M is the most advanced machine to be offered and is extremely fast.

Windrush Micro Systems Ltd. also offer the DRAGON 32/2M in the DRAGON 32/4M version. DRAGON 32/4M has 4M of memory, plus 16K of extra memory, 8M of memory and 16K of extra memory. This represents an increase in memory of 3200% and 6400% respectively. DRAGON 32/4M is also available in 4M version. DRAGON 32/4M is the most advanced machine to be offered and is extremely fast.

Windrush Micro Systems Ltd. also offer the DRAGON 32/4M in the DRAGON 32/8M version. DRAGON 32/8M has 8M of memory, plus 16K of extra memory, 16M of memory and 16K of extra memory. This represents an increase in memory of 6400% and 12800% respectively. DRAGON 32/8M is also available in 8M version. DRAGON 32/8M is the most advanced machine to be offered and is extremely fast.

Windrush Micro Systems Ltd. also offer the DRAGON 32/8M in the DRAGON 32/16M version. DRAGON 32/16M has 16M of memory, plus 16K of extra memory, 32M of memory and 16K of extra memory. This represents an increase in memory of 12800% and 25600% respectively. DRAGON 32/16M is also available in 16M version. DRAGON 32/16M is the most advanced machine to be offered and is extremely fast.

Windrush Micro Systems Ltd. also offer the DRAGON 32/16M in the DRAGON 32/32M version. DRAGON 32/32M has 32M of memory, plus 16K of extra memory, 64M of memory and 16K of extra memory. This represents an increase in memory of 25600% and 51200% respectively. DRAGON 32/32M is also available in 32M version. DRAGON 32/32M is the most advanced machine to be offered and is extremely fast.

Windrush Micro Systems Ltd. also offer the DRAGON 32/32M in the DRAGON 32/64M version. DRAGON 32/64M has 64M of memory, plus 16K of extra memory, 128M of memory and 16K of extra memory. This represents an increase in memory of 51200% and 102400% respectively. DRAGON 32/64M is also available in 64M version. DRAGON 32/64M is the most advanced machine to be offered and is extremely fast.

Windrush Micro Systems Ltd. also offer the DRAGON 32/64M in the DRAGON 32/128M version. DRAGON 32/128M has 128M of memory, plus 16K of extra memory, 256M of memory and 16K of extra memory. This represents an increase in memory of 102400% and 204800% respectively. DRAGON 32/128M is also available in 128M version. DRAGON 32/128M is the most advanced machine to be offered and is extremely fast.

Windrush Micro Systems Ltd. also offer the DRAGON 32/128M in the DRAGON 32/256M version. DRAGON 32/256M has 256M of memory, plus 16K of extra memory, 512M of memory and 16K of extra memory. This represents an increase in memory of 204800% and 409600% respectively. DRAGON 32/256M is also available in 256M version. DRAGON 32/256M is the most advanced machine to be offered and is extremely fast.

Windrush Micro Systems Ltd. also offer the DRAGON 32/256M in the DRAGON 32/512M version. DRAGON 32/512M has 512M of memory, plus 16K of extra memory, 1G of memory and 16K of extra memory. This represents an increase in memory of 409600% and 819200% respectively. DRAGON 32/512M is also available in 512M version. DRAGON 32/512M is the most advanced machine to be offered and is extremely fast.

Windrush Micro Systems Ltd. also offer the DRAGON 32/512M in the DRAGON 32/1G version. DRAGON 32/1G has 1G of memory, plus 16K of extra memory, 2G of memory and 16K of extra memory. This represents an increase in memory of 819200% and 1638400% respectively. DRAGON 32/1G is also available in 1G version. DRAGON 32/1G is the most advanced machine to be offered and is extremely fast.

Windrush Micro Systems Ltd. also offer the DRAGON 32/1G in the DRAGON 32/2G version. DRAGON 32/2G has 2G of memory, plus 16K of extra memory, 4G of memory and 16K of extra memory. This represents an increase in memory of 1638400% and 3276800% respectively. DRAGON 32/2G is also available in 2G version. DRAGON 32/2G is the most advanced machine to be offered and is extremely fast.

Windrush Micro Systems Ltd. also offer the DRAGON 32/2G in the DRAGON 32/4G version. DRAGON 32/4G has 4G of memory, plus 16K of extra memory, 8G of memory and 16K of extra memory. This represents an increase in memory of 3276800% and 6553600% respectively. DRAGON 32/4G is also available in 4G version. DRAGON 32/4G is the most advanced machine to be offered and is extremely fast.

Windrush Micro Systems Ltd. also offer the DRAGON 32/4G in the DRAGON 32/8G version. DRAGON 32/8G has 8G of memory, plus 16K of extra memory, 16G of memory and 16K of extra memory. This represents an increase in memory of 6553600% and 13107200% respectively. DRAGON 32/8G is also available in 8G version. DRAGON 32/8G is the most advanced machine to be offered and is extremely fast.

Windrush Micro Systems Ltd. also offer the DRAGON 32/8G in the DRAGON 32/16G version. DRAGON 32/16G has 16G of memory, plus 16K of extra memory, 32G of memory and 16K of extra memory. This represents an increase in memory of 13107200% and 26214400% respectively. DRAGON 32/16G is also available in 16G version. DRAGON 32/16G is the most advanced machine to be offered and is extremely fast.

Windrush Micro Systems Ltd. also offer the DRAGON 32/16G in the DRAGON 32/32G version. DRAGON 32/32G has 32G of memory, plus 16K of extra memory, 64G of memory and 16K of extra memory. This represents an increase in memory of 26214400% and 52428800% respectively. DRAGON 32/32G is also available in 32G version. DRAGON 32/32G is the most advanced machine to be offered and is extremely fast.

Windrush Micro Systems Ltd. also offer the DRAGON 32/32G in the DRAGON 32/64G version. DRAGON 32/64G has 64G of memory, plus 16K of extra memory, 128G of memory and 16K of extra memory. This represents an increase in memory of 52428800% and 104857600% respectively. DRAGON 32/64G is also available in 64G version. DRAGON 32/64G is the most advanced machine to be offered and is extremely fast.

Windrush Micro Systems Ltd. also offer the DRAGON 32/64G in the DRAGON 32/128G version. DRAGON 32/128G has 128G of memory, plus 16K of extra memory, 256G of memory and 16K of extra memory. This represents an increase in memory of 104857600% and 209715200% respectively. DRAGON 32/128G is also available in 128G version. DRAGON 32/128G is the most advanced machine to be offered and is extremely fast.

Windrush Micro Systems Ltd. also offer the DRAGON 32/128G in the DRAGON 32/256G version. DRAGON 32/256G has 256G of memory, plus 16K of extra memory, 512G of memory and 16K of extra memory. This represents an increase in memory of 209715200% and 419430400% respectively. DRAGON 32/256G is also available in 256G version. DRAGON 32/256G is the most advanced machine to be offered and is extremely fast.

Windrush Micro Systems Ltd. also offer the DRAGON 32/256G in the DRAGON 32/512G version. DRAGON 32/512G has 512G of memory, plus 16K of extra memory, 1024G of memory and 16K of extra memory. This represents an increase in memory of 419430400% and 838860800% respectively. DRAGON 32/512G is also available in 512G version. DRAGON 32/512G is the most advanced machine to be offered and is extremely fast.

Windrush Micro Systems Ltd. also offer the DRAGON 32/512G in the DRAGON 32/1M version. DRAGON 32/1M has 1M of memory, plus 16K of extra memory, 2M of memory and 16K of extra memory. This represents an increase in memory of 838860800% and 1677721600% respectively. DRAGON 32/1M is also available in 1M version. DRAGON 32/1M is the most advanced machine to be offered and is extremely fast.

Windrush Micro Systems Ltd. also offer the DRAGON 32/1M in the DRAGON 32/2M version. DRAGON 32/2M has 2M of memory, plus 16K of extra memory, 4M of memory and 16K of extra memory. This represents an increase in memory of 1677721600% and 3355443200% respectively. DRAGON 32/2M is also available in 2M version. DRAGON 32/2M is the most advanced machine to be offered and is extremely fast.

Windrush Micro Systems Ltd. also offer the DRAGON 32/2M in the DRAGON 32/4M version. DRAGON 32/4M has 4M of memory, plus 16K of extra memory, 8M of memory and 16K of extra memory. This represents an increase in memory of 3355443200% and 6710886400% respectively. DRAGON 32/4M is also available in 4M version. DRAGON 32/4M is the most advanced machine to be offered and is extremely fast.

Windrush Micro Systems Ltd. also offer the DRAGON 32/4M in the DRAGON 32/8M version. DRAGON 32/8M has 8M of memory, plus 16K of extra memory, 16M of memory and 16K of extra memory. This represents an increase in memory of 6710886400% and 13421772800% respectively. DRAGON 32/8M is also available in 8M version. DRAGON 32/8M is the most advanced machine to be offered and is extremely fast.

Windrush Micro Systems Ltd. also offer the DRAGON 32/8M in the DRAGON 32/16M version. DRAGON 32/16M has 16M of memory, plus 16K of extra memory, 32M of memory and 16K of extra memory. This represents an increase in memory of 13421772800% and 26843545600% respectively. DRAGON 32/16M is also available in 16M version. DRAGON 32/16M is the most advanced machine to be offered and is extremely fast.

Windrush Micro Systems Ltd. also offer the DRAGON 32/16M in the DRAGON 32/32M version. DRAGON 32/32M has 32M of memory, plus 16K of extra memory, 64M of memory and 16K of extra memory. This represents an increase in memory of 26843545600% and 53687091200% respectively. DRAGON 32/32M is also available in 32M version. DRAGON 32/32M is the most advanced machine to be offered and is extremely fast.

Windrush Micro Systems Ltd. also offer the DRAGON 32/32M in the DRAGON 32/64M version. DRAGON 32/64M has 64M of memory, plus 16K of extra memory, 128M of memory and 16K of extra memory. This represents an increase in memory of 53687091200% and 107374182400% respectively. DRAGON 32/64M is also available in 64M version. DRAGON 32/64M is the most advanced machine to be offered and is extremely fast.

Windrush Micro Systems Ltd. also offer the DRAGON 32/64M in the DRAGON 32/128M version. DRAGON 32/128M has 128M of memory, plus 16K of extra memory, 256M of memory and 16K of extra memory. This represents an increase in memory of 107374182400% and 214748364800% respectively. DRAGON 32/128M is also available in 128M version. DRAGON 32/128M is the most advanced machine to be offered and is extremely fast.

Windrush Micro Systems Ltd. also offer the DRAGON 32/128M in the DRAGON 32/256M version. DRAGON 32/256M has 256M of memory, plus 16K of extra memory, 512M of memory and 16K of extra memory. This represents an increase in memory of 214748364800% and 429496729600% respectively. DRAGON 32/256M is also available in 256M version. DRAGON 32/256M is the most advanced machine to be offered and is extremely fast.

Windrush Micro Systems Ltd. also offer the DRAGON 32/256M in the DRAGON 32/512M version. DRAGON 32/512M has 512M of memory, plus 16K of extra memory, 1G of memory and 16K of extra memory. This represents an increase in memory of 429496729600% and 858993459200% respectively. DRAGON 32/512M is also available in 512M version. DRAGON 32/512M is the most advanced machine to be offered and is extremely fast.

Windrush Micro Systems Ltd. also offer the DRAGON 32/512M in the DRAGON 32/1G version. DRAGON 32/1G has 1G of memory, plus 16K of extra memory, 2G of memory and 16K of extra memory. This represents an increase in memory of 858993459200% and 1717986918400% respectively. DRAGON 32/1G is also available in 1G version. DRAGON 32/1G is the most advanced machine to be offered and is extremely fast.

Windrush Micro Systems Ltd. also offer the DRAGON 32/1G in the DRAGON 32/2G version. DRAGON 32/2G has 2G of memory, plus 16K of extra memory, 4G of memory and 16K of extra memory. This represents an increase in memory of 1717986918400% and 3435973836800% respectively. DRAGON 32/2G is also available in 2G version. DRAGON 32/2G is the most advanced machine to be offered and is extremely fast.

Windrush Micro Systems Ltd. also offer the DRAGON 32/2G in the DRAGON 32/4G version. DRAGON 32/4G has 4G of memory, plus 16K of extra memory, 8G of memory and 16K of extra memory. This represents an increase in memory of 3435973836800% and 6871947673600% respectively. DRAGON 32/4G is also available in 4G version. DRAGON 32/4G is the most advanced machine to be offered and is extremely fast.

Windrush Micro Systems Ltd. also offer the DRAGON 32/4G in the DRAGON 32/8G version. DRAGON 32/8G has 8G of memory, plus 16K of extra memory, 16G of memory and 16K of extra memory. This represents an increase in memory of 6871947673600% and 13743895347200% respectively. DRAGON 32/8G is also available in 8G version. DRAGON 32/8G is the most advanced machine to be offered and is extremely fast.

Windrush Micro Systems Ltd. also offer the DRAGON 32/8G in the DRAGON 32/16G version. DRAGON 32/16G has 16G of memory, plus 16K of extra memory, 32G of memory and 16K of extra memory. This represents an increase in memory of 13743895347200% and 27487790694400% respectively. DRAGON 32/16G is also available in 16G version. DRAGON 32/16G is the most advanced machine to be offered and is extremely fast.

Windrush Micro Systems Ltd. also offer the DRAGON 32/16G in the DRAGON 32/32G version. DRAGON 32/32G has 32G of memory, plus 16K of extra memory, 64G of memory and 16K of extra memory. This represents an increase in memory of 27487790694400% and 54975581388800% respectively. DRAGON 32/32G is also available in 32G version. DRAGON 32/32G is the most advanced machine to be offered and is extremely fast.

Windrush Micro Systems Ltd. also offer the DRAGON 32/32G in the DRAGON 32/64G version. DRAGON 32/64G has 64G of memory, plus 16K of extra memory, 128G of memory and 16K of extra memory. This represents an increase in memory of 54975581388800% and 10995116277600% respectively. DRAGON 32/64G is also available in 64G version. DRAGON 32/64G is the most advanced machine to be offered and is extremely fast.

Windrush Micro Systems Ltd. also offer the DRAGON 32/64G in the DRAGON 32/128G version. DRAGON 32/128G has 128G of memory, plus 16K of extra memory, 256G of memory and 16K of extra memory. This represents an increase in memory of 10995116277600% and 21990232555200% respectively. DRAGON 32/128G is also available in 128G version. DRAGON 32/128G is the most advanced machine to be offered and is extremely fast.

Windrush Micro Systems Ltd. also offer the DRAGON 32/128G in the DRAGON 32/256G version. DRAGON 32/256G has 256G of memory, plus 16K of extra memory, 512G of memory and 16K of extra memory. This represents an increase in memory of 21990232555200% and 43980465110400% respectively. DRAGON 32/256G is also available in 256G version. DRAGON 32/256G is the most advanced machine to be offered and is extremely fast.

Windrush Micro Systems Ltd. also offer the DRAGON 32/256G in the DRAGON 32/512G version. DRAGON 32/512G has 512G of memory, plus 16K of extra memory, 1024G of memory and 16K of extra memory. This represents an increase in memory of 43980465110400% and 87960920220800% respectively. DRAGON 32/512G is also available in 512G version. DRAGON 32/512G is the most advanced machine to be offered and is extremely fast.

Windrush Micro Systems Ltd. also offer the DRAGON 32/512G in the DRAGON 32/1M version. DRAGON 32/1M has 1M of memory, plus 16K of extra memory, 2M of memory and 16K of extra memory. This represents an increase in memory of 87960920220800% and 175921840441600% respectively. DRAGON 32/1M is also available in 1M version. DRAGON 32/1M is the most advanced machine to be offered and is extremely fast.

Windrush Micro Systems Ltd. also offer the DRAGON 32/1M in the DRAGON 32/2M version. DRAGON 32/2M has 2M of memory, plus 16K of extra memory, 4M of memory and 16K of extra memory. This represents an increase in memory of 175921840441600% and 351843680883200% respectively. DRAGON 32/2M is also available in 2M version. DRAGON 32/2M is the most advanced machine to be offered and is extremely fast.

Windrush Micro Systems Ltd. also offer the DRAGON 32/2M in the DRAGON 32/4M version. DRAGON 32/4M has 4M of memory, plus 16K of extra memory, 8M of memory and 16K of extra memory. This represents an increase in memory of 351843680883200% and 703687361766400% respectively. DRAGON 32/4M is also available in 4M version. DRAGON 32/4M is the most advanced machine to be offered and is extremely fast.

Windrush Micro Systems Ltd. also offer the DRAGON 32/4M in the DRAGON 32/8M version. DRAGON 32/8M has 8M of memory, plus 16K of extra memory, 16M of memory and 16K of extra memory. This represents an increase in memory of 703687361766400% and 1407374723532800% respectively. DRAGON 32/8M is also available in 8M version. DRAGON 32/8M is the most advanced machine to be offered and is extremely fast.

Windrush Micro Systems Ltd. also offer the DRAGON 32/8M in the DRAGON 32/16M version. DRAGON 32/16M has 16M of memory, plus 16K of extra memory, 32M of memory and 16K of extra memory. This represents an increase in memory of 1407374723532800% and 2814749447065600% respectively. DRAGON 32/16M is also available in 16M version. DRAGON 32/16M is the most advanced machine to be offered and is extremely fast.

Windrush Micro Systems Ltd. also offer the DRAGON 32/16M in the DRAGON 32/32M version. DRAGON 32/32M has 32M of memory, plus 16K of extra memory, 64M of memory and 16K of extra memory. This represents an increase in memory of 2814749447065600% and 5629498894131200% respectively. DRAGON 32/32M is also available in 32M version. DRAGON 32/32M is the most advanced machine to be offered and is extremely fast.

Windrush Micro Systems Ltd. also offer the DRAGON 32/32M in the DRAGON 32/64M version. DRAGON 32/64M has 64M of memory, plus 16K of extra memory, 128M of memory and 16K of extra memory. This represents an increase in memory of 5629498894131200% and 11258997788262400% respectively. DRAGON 32/64M is also available in 64M version. DRAGON 32/64M is the most advanced machine to be offered and is extremely fast.

Windrush Micro Systems Ltd. also offer the DRAGON 32/64M in the DRAGON 32/128M version. DRAGON 32/128M has 128M of memory, plus 16K of extra memory, 256M of memory and 16K of extra memory. This represents an increase in memory of 11258997788262400% and 22517995576524800% respectively. DRAGON 32/128M is also available in 128M version. DRAGON 32/128M is the most advanced machine to be offered and is extremely fast.

Windrush Micro Systems Ltd. also offer the DRAGON 32/128M in the DRAGON 32/256M version. DRAGON 32/256M has 256M of memory, plus 16K of extra memory, 512M of memory and 16K of extra memory. This represents an increase in memory of 22517995576524800% and 4503599115304960% respectively. DRAGON 32/256M is also available in 256M version. DRAGON 32/256M is the most advanced machine to be offered and is extremely fast.

Windrush Micro Systems Ltd. also offer the DRAGON 32/256M in the DRAGON 32/512M version. DRAGON 32/512M has 512M of memory, plus 16K of extra memory, 1024M of memory and 16K of extra memory. This represents an increase in memory of 4503599115304960% and 9007198230609920% respectively. DRAGON 32/512M is also available in 512M version. DRAGON 32/512M is the most advanced machine to be offered and is extremely fast.

Windrush Micro Systems Ltd. also offer the DRAGON 32/512M in the DRAGON 32/1G version. DRAGON 32/1G has 1G of memory, plus 16K of extra memory, 2G of memory and 16K of extra memory. This represents an increase in memory of 9007198230609920% and 18014396461219840% respectively. DRAGON 32/1G is also available in 1G version. DRAGON 32/1G is the most advanced machine to be offered and is extremely fast.

Windrush Micro Systems Ltd. also offer the DRAGON 32/1G in the DRAGON 32/2G version. DRAGON 32/2G has 2G of memory, plus 16K of extra memory, 4G of memory and 16K of extra memory. This represents an increase in memory of 18014396461219840% and 36028792922439680% respectively. DRAGON 32/2G is also available in 2G version. DRAGON 32/2G is the most advanced machine to be offered and is extremely fast.
